Course Description
The course explores the history and life of the Eastern Roman empire, the so-called ‘Byzantium’. The empire encompassed and extended well beyond the Mediterranean region and survived for over a thousand of years: from its Christianization in the 4th century AD up to the fall of its capital, Constantinople, to the Ottoman Turks in 1453. By which means was an empire of this magnitude able to negotiate its survival over the course of a millennium? In examining the issue, particular attention will be paid to the investigation of the prevailing social, political and economic conditions in the region, as well as the massive changes in culture, religion, demography, geography and ideology that Byzantium first introduced to the Greco-Roman world that it had inherited. The empire, throughout its extraordinary life, promulgated and maintained a unique ideology that was, paradoxically, able to protect an image of timelessness and unchanging order, while at the same time accomplishing transformation and innovation that allowed the Byzantines to compete with and relate to their neighbours to the East and West at key moments in the empire’s long history. Besides the narrative of main historical events, special emphasis will be given throughout this course, to the character and riches of this unique civilization identifying the fundamental questions about Byzantium- what it ultimately was, and what special significance, if any, it holds for us today.

Class sessions combine lectures, as well as discussion of primary texts and analysis of visual material, in order to provide a holistic introduction to the history and culture of the Eastern Mediterranean during the period.

Course Requirements
No previous knowledge of history is required. A mid-term exam (15% of the final grade), a class assignment (i.e. critical summary of a book or article related to the course, 10% of the final grade), a final essay (around 3000 words, 30% of the final grade) and a final exam (35% of the final grade) are required.
