College Year in Athens

MS347 (Summer 2018)
*When Egypt meets the Aegean: Interconnections in the Bronze Age Eastern Mediterranean (Thera, Crete, Athens)*

_Instructors_
Prof. Nanno Marinatos and Dr Angelos Papadopoulos
Email: nannom@uic.edu and papadopoulos.angelos@gmail.com
Course description
This course provides an interpretative survey and a thematic coverage of the history of the Aegean and Egypt with a special focus on the Late Bronze Age (ca. 1700-1050 B.C.). The students will explore a brilliant moment in the history of civilization of Greece, the Aegean Bronze Age, during which Egyptian culture had a great impact on the local societies. A number of aspects of everyday life will be explored, such as architecture and planning, burial practices, trade and exchange, scripts and literacy, religion and ritual, arts and crafts, hierarchy and political organization.

The participants will benefit from accessing the unique collections of Egyptian and Aegean prehistoric antiquities at the Athens National Archaeological Museum and the stimulating collection of Cypriot antiquities at the Museum of Cycladic Art. A great part of the course will take place at the site of Akrotiri on Thera. In addition, a five-day visit to the island of Crete, a land of extreme archaeological importance, is organised in order to explore the complex sites of Knossos, Mallia and Phaistos, the villa of Nirou Khani and the Archaeological Museum of Herakleion, the magnificent Quartier Mu, the harbour of Kommos, etc. As it is crucial to study these cultures in depth, they will be discussed within their greater Aegean social and political context. Thus a two-day excursion to the citadels of Mycenae and Tiryns and the cemetery of Dendra, as well as a day-trip to the city of Thebes with the magnificent “Treasury of Minyas” and its newly renovated Archaeological Museum are a fundamental part of this summer course.

Course aim
The aim of the course is to illustrate the relationship between prehistoric Greece and Egypt and to explore the archaeological sites and material culture of the Aegean societies of the Late Bronze Age. The course aims also at making students reflect on the definition of what constitutes a high civilization. What was the role of Egypt in affecting Minoan art and culture? How did Crete influence Mycenae? Were the island harbour-towns major players in the trade networks? These questions will be discussed from an eastern Mediterranean perspective.

Learning outcomes
By the end of the course the students will have:
- familiarized themselves with the archaeology of the region through personal experience and some bibliographic research.
- improved their on-site observations at major archaeological sites.
- seen a unique, currently on-going (since 1967) archaeological excavation at Akrotiri, the so-called “Pompeii of prehistoric Aegean”
- been aware of the methodologies and scientific applications needed for the study of the human past and especially complex societies.
Prerequisites
This course has no prerequisites and no knowledge of foreign languages is required as it is designed to cover all basic knowledge of the topic. However, it would be an advantage to have already taken one or more courses on Aegean Prehistory, Greek, Egyptian or Near Eastern Archaeology.

Readings for the course
i) (Instead of a) Textbook
Although this course is based on a series of readings (see next part) rather than on a textbook (or two), the following two publications, available free to download, are extremely useful for the purposes of this programme and provide great data for research and stimulating discussions. Feel free to use them throughout these four weeks.

ii) Required reading
For each class/visit an amount of Required reading of one or two papers is required. The participants should preferably read these papers before the class, in order to comprehend the topic and participate lively in the discussion. All the Required readings are available on moodle as pdf files.

iii) Recommended reading
The course covers a wide range of themes and topics throughout a lengthy period of time over a wide geographical region. As a result, the bibliography is immense, starting from simple excavation reports to long, synthetic work bringing together data from a variety of sites and offering various interpretations. The required readings consist of a long list of publications, all of which are available at CYA and/or online. Students are encouraged to consult this list for further personal research, either towards your essay work or simply to comprehend better the dynamics and the complexity of the Bronze Age societies of Aegean and Egypt.

iv) Handouts
Students will receive handouts in order to prepare for the following lecture or site/museum visit. The handouts will include basic key words, some research questions and important issues that will be discussed in class, as well as the required and recommended readings. All handouts will be available only at moodle.
v) Study guide
A study guide will be provided, so that you can use it for key-aspects of Aegean and Eastern Mediterranean archaeology, chronologies, maps and other useful information. Bear in mind that the guide is exactly that, a guide, and it cannot replace your attention in class and the study of the Required Readings.

vi) Online resources
There are several online resources on the subject of the course some of which you will find below:

- Latsis Foundation, The Museums Cycle
- Dartmouth Aegean Prehistoric Archaeology
  [http://www.dartmouth.edu/~prehistory/aegean/](http://www.dartmouth.edu/~prehistory/aegean/)
- Nestor Aegean Bibliography
  [http://classics.uc.edu/nestor/index.php/nestorbib](http://classics.uc.edu/nestor/index.php/nestorbib)
- Metropolitan Museum of Art, Heilbrunn Timeline of Art History
  [http://www.metmuseum.org/toah/](http://www.metmuseum.org/toah/)
- Foundation of Hellenic World
- National Archaeological Museum at Athens
- Museum of Cycladic Art
  [http://www.cycladic.gr](http://www.cycladic.gr)
- Greek Ministry of Culture and Sports- Odysseus
- Minoan Crete

**Assessment**

i) Attendance and participation
As this is a short and very demanding course, you are expected to attend all classes and contribute to the discussions and exchange of ideas and views. As this is a lively and interactive course, you are also encouraged to criticise any interpretations you find problematic and to show familiarity via your required readings. Additionally, there will be with various on-site group and individual activities.

*Grade:* Your overall attendance will count towards 20% of the final grade.

ii) Site report (oral presentation and essay)
You will be asked to deliver a **10/15-minute** oral presentation on any building, artefact or site you wish (see Calendar of activities on page 7 for a list of sites and topics). After your group presentations, you are requested to write a short report (**ca. 350 words**), which will focus on what you presented.

*Grade:* This assignment will count towards 20% of the final grade.

<table>
<thead>
<tr>
<th><strong>Presentation date:</strong></th>
<th>Open</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Report submission date:</strong></td>
<td>18 July</td>
</tr>
</tbody>
</table>
iii) Research essay

*Topic:* Choose any topic you find is interesting from the list of suggested topics in page 6.

*Format:* Use Times New Roman font, size 12 and preferably footnotes (no endnotes or in-text references).

*Length:* The essay should be no more than 1500 words (excluding bibliography, tables, maps and illustrations).

*Plagiarism:* You should be very clear and careful in order to reference your work, source the illustrations and give proper reference to other people’s work. There is nothing wrong in using theories and ideas found elsewhere in publications or online, but it is considered a copyright violation to use this data without properly referencing the person who made it available to the public.

*Delivery:* You are asked to submit your manuscript to the instructors via email.

*Grade:* The essay together with the oral presentation will count towards 30% of your final grade.

---

**Research essay deadline:** 13 July

---

iv) Final examinations

At the end of the course (20th of July) a written exam will take place at the facilities of College Year in Athens and it will take the form of an essay and some short questions.

*Grade:* The examinations will count towards 30% of the final grade.

The **Final Grade** is broken down as follows:

- Class attendance and participation 20%
- Site presentation (oral and written summary/report): 20%
- Research essay: 30%
- Final examinations: 30%

**Total: 100%**

**Hints and tips**

*Access to bibliography*

Libraries:

- @ Athens: Library of the College Year in Athens (CYA)
- @ Athens: Athens Archaeological Society (ask instructor for details)
- @ Thera: Library facilities of Bellonio Foundation at Fira.

*Portable library*

A selection of important books and journal articles will be available throughout our residence at Thera and Crete.

*Outdoor activities*

There will be plenty of outdoor activities, such as fieldtrips to various archaeological sites and city walking. Athens and the Greek islands can be quite warm during June and July so you need to take all necessary precautions regarding sun protection (hat, sun block) and always carry some water with you. Ideally, as some of the visits are one-off, you should carry with you your notebook and a pen/ pencil, a photographic...
camera (be aware that in some museums and sites photography is not allowed) and your smile.

Student-Instructor collaboration
Students are encouraged to discuss with the instructors any aspect of the course that may be of special interest to them throughout the programme. There will be plenty of time between classes and site, museum or laboratory visits to do so.

Note for the use of laptops
In-class or on-site use of laptops and other devices is permitted if that facilitates course-related activities such as note-taking, looking up references, etc. Laptop or other device privileges will be suspended if there are not used for class-related work. Members of the faculty are welcomed to create a ‘laptop-free zone’ in the classroom for students who do not use electronic devices and feel distracted if they sit close to one.

Suggested research essay titles

- Sir Arthur Evans and Knossos
- The iconography of the Pharaoh
- Bronze Age metallurgy
- Scientific methods in archaeology
- Carbon-14 dating
- Thoughts and views on ‘palatial redistribution’
- The town of Akrotiri on Thera
- The Shaft Graves of Mycenae: Social stratification and complexity
- The citadels of Mycenae and Tiryns: Compare and contrast
- The Uluburun shipwreck
- The End of the Bronze Age in the Eastern Mediterranean
- Iconography as a source of information for the everyday life
- Bull-leaping: Myth or reality?
- Defining a ‘palace’
- Why people bury their dead with offerings?
- The ‘Mask of Agamemnon’
- Cypriot middlemen in trade networks
- The weapons of the Mycenaeans
- Linear A/ Linear B
- The Phaistos Disc
- The practicalities of a “Pax Minoica”
- The Palace of Pylos
- Knossos and its environs

Calendar of activities (detailed)

CYA College Year in Athens
NAM National Archaeological Museum at Athens
MCA Museum of Cycladic Art

26 June (Tuesday)
1. Chronology, geography and the Eastern Mediterranean context
Venue: CYA
Description
Aegean societies should be studied and understood within the greater environmental and geographical context over a long period of time. This introduction will focus on the climate and ecology of the Greek region, the connection between people, animals, land and sea and how all these factors affected the development of these very distinctive local cultures. Special attention should be paid to chronological issues and relevant problems and limitations.

Required reading
Aruz in Aruz et al. 2008: 3-10
Mee 2011: 1-7

Recommended reading
Abulafia 2014 (for a diachronic review)
Bintliff 2012: 11-27
Dickinson 1994: 23-29
Hughes 2005 (various chapters)
Manning in Cline 2010: 11-28
Muhly in Cline 2010: 3-10
Renfrew and Bahn 2001: Ch. 2, 4 and 9
Shelmerdine in Shelmerdine 2008: 1-18
Tartaron 2008: 83-161

Food for thought
To what extent environmental factors affect the shaping of cultures and civilizations?

27 June (Wednesday)
2. Cultures in Contact
Venue: CYA
Description
What do we mean by contact between cultures? Is there a network? What is the evidence? What is the role of the state, the polity, the king, the merchant during these interactions? These are some of the issues that will be addressed and discussed during this class, in order to start our trip around the Aegean with a strong theoretical background, considering all the limitations and methodological approaches on this matter.
Required reading
Parkinson and Galaty in Parkinson and Galaty 2010: 3-28

Recommended reading
Aruz, J. S.B. Graff and Y. Rakic (eds.) (2013)
Sherratt in Parkinson and Galaty 2009: 81-106

Food for thought
How many ways can you think for an object to move from point A to point B?

28 June (Thursday)
3. Early Seafarers: Cyclades and beyond
Venue: NAM
Description
Prior to the vast trade networks and impressive exchange systems of the Late Bronze Age, we need to explore the beginnings of seafaring and the evolution of technology that allowed the long-distance trips of the LBA merchants. Transportation of raw materials dates back to at least 8th millennium B.C. and the islands of the Cyclades are a very informative and diachronic case study.

The introduction of the sail and its implications

29 June (Friday)
4. The islands and the mainland
Venue: NAM
Description
The NAM hosts some of the most impressive artefacts of the ancient world. The weapons, gold jewellery, metal vessels and objects made of exotic raw materials that were used as offerings to the deceased of Grave Circles A and B clearly show the need for differentiation between social classes and also provide evidence for interconnections between the peoples of the islands, Crete and the mainland. These interactions will be discussed extensively in front of these spectacular burials gifts.

Food for thought
- The import of exotic items and raw materials in the early Late Bronze Age Aegean. Function and symbolic meaning.

30 June (Saturday)
5. Age of the Empire: New Kingdom Egypt
Venue: NAM
Description
The long history of cultural interconnections between the Aegean and Egypt starting from the Bronze Age will be discussed in this class, while examining the artefacts exhibited at the NAM. Trade networks and sea routes facilitate not only the movement of goods, such as raw materials and finished products, but also ideas, technologies and beliefs. The Egyptian galleries will allow us to discuss several aspects of the distinctive New Kingdom period.

Required reading

Food for thought
How far back can we trace the earliest evidence of direct contact between Aegean and Egypt?

01 July (Sunday)
AM: Departure for Thera
Free Day
02 July (Monday)
6. Akrotiri: Pompeii of prehistoric Aegean
Site visit: Akrotiri, Thera

Description
The time has come to explore one of the most amazing archaeological discoveries in world history: the town of Akrotiri that was buried under tons of volcanic ash making this site a true “Pompeii of the prehistoric Aegean”. We are going to walk along the original roads and alleys and see how a Late Bronze Age settlement looked like.

Required reading
Doumas in Cline 2010: 752-761

Recommended reading
Doumas 1983: 29-42
Doumas et al. 2015
Niemeier in Hardy et al. 1990: 267-284
Manning in Cline 2010: 457-474
Marinatos Sp. 1971
Marinatos Sp. 1999: Thera I-VII

Food for thought
Can you identify any mainland or Minoan elements in the arts of Akrotiri? Which is the direction of the artistic influence?

7. An active volcano
Site visit: Kammeni islets

Description
A boat trip to the islets of Kammeni will allow students to familiarise themselves with the geological history of the island, the volcano and the deep blue waters of the caldera.

Required reading
Vougioukalakis 2013

Recommended reading
Hardy et al. 1990: Vol. 2 (various papers on Earth Sciences)

Food for thought
Discuss the relationship between settlement, landscape, geography and natural resources.

03 July (Tuesday)
8. Architecture and planning: Private & public
Site visit: Akrotiri

Description
The town of Akrotiri provided modern scholarship with the unique opportunity to examine in situ buildings up to three storeys high, some with elaborate façades and
impressive architectural elements, such as light wells, staircases and pier-and-door partitions. At the same time there are abundant public spaces, such as squares and of course alleys and main roads giving valuable information on the structure and layout of Middle and Late Bronze Age town planning. We will be able to explore all these aspects within the site itself.

**Required reading**

Palyvou in Doumas *et al.* 2015: 29-50

**Recommended reading**

Gates 2011: Ch. 7
Hitchcock in Cline 2010: 189-199
Mee 2011: 69-82
Sali-Axioti in Hardy *et al.* 1990: 437-440

**Food for thought**

Compose a brief guide for one of the buildings discovered at Akrotiri. Discuss its construction, architecture, decoration (if any), contents, function and location within the town.

04 July (Wednesday)

9. Theran arts and crafts

**Venue:** Museum of Prehistoric Thera

**Description**

From the current archaeological evidence we know that Akrotiri was not the only settlement on the island of Thera during the Late Cycladic I period. At the same time, thanks to the excavations for the new protective roof, it is possible to track down the chronological sequence of Akrotiri down to the Neolithic period. At the Museum of Prehistoric Thera at Fira students will be able to see the available material culture and also explore in depth various aspects of life of the final phase of Akrotiri. Finally, the direct or indirect contacts between Thera and the Eastern Mediterranean will be discussed in front of the relevant exhibit case.

**Required reading**

Doumas 2013: 180-187

**Recommended reading**

Davis in Cullen 2001: 19-76 (+ addendum Davis *et al.* 77-94)
Doumas 1983: 77-124

**Food for thought**

The volcanic eruption of the Thera volcano allowed the preservation of perishable materials, like foodstuffs and traces of baskets that usually do not survive in the archaeological record of Greece due to its climatic condition. Discuss with examples what kind of information we can get and how.
10. Exploring an untouched site: The hill of Archangelos

Site visit: Archangelos

Description
The island of Thera is not fully explored and it seems that there are yet further sites to be identified and explore. One of these sites, only partly studied, is the hill of Archangelos, in very close proximity to the modern village of Akrotiri, but clearly outside the area covered by the prehistoric settlement. We are going to visit and explore this area as only limited excavation took place back in 1870.

Required reading
No reading is required

Recommended reading
Davis and Cherry in Hardy et al. 1990: 185-200
Davis in Shelmerdine 2006: 186-208
Dickinson 1994: 45-94

Food for thought
Which other sites (contemporary to Akrotiri) existed on the island of Thera?

05 July (Thursday)
11. Small world interactions: Thera, Crete and the islands

Site visit: Akrotiri

Description
Akrotiri was not the only harbour-town that thrived during the Middle and Late Bronze Age in the Aegean. Other sites, like Phylakopi in Melos and Agia Irini on Keos prospered as well, perhaps all of them acting as a bridge between Crete and the mainland. Cretan influence is more than visible in these (and other) sites, so our aim will be to explore these technological and cultural aspects and discuss if we can talk about influence, domination or even colonization.

Required reading
Davis in Shelmerdine 2008: 186-208

Recommended reading
Bintliff 2012: 155-181
Brysbaert in Antoniadou and Pace 2007: 325-359
Knappett and Nikolakopoulou 2008: 1-42
Preziosi and Hitchcock 1999: 122-135

Food for thought
Why Cycladic towns became prominent harbour towns? Is there a geographical reason?

06 July (Friday)
12. After Akrotiri?

Site visit: Ancient Thera
Description
The magnificent Ancient Thera, the only major town on the island of Thera from the 9th or 8th c. B.C. until the spread of Christianity, is located at a height of 369 m. above sea level on top of the Mesa Vouno mount. A spectacular town with its sanctuaries, the agora and other public buildings also created a major colony, Cyrene.

Required reading
No reading is required

Recommended reading
Doumas 2001: 66-84

Food for thought
The relations between Thera and the Greek world, as well as the Eastern Mediterranean.

PM: Departure for Crete

07 July (Saturday)
13. Minoan arts and crafts
Venue: Archaeological Museum of Herakleion

Description
The newly renovated Herakleion Museum hosts a large and superb collection of works of art, weapons and other material culture from the entire island of Crete dating from Prehistory to Late Antiquity. We shall focus on the prehistoric collection and appreciate the level of sophistication the Cretans reached, especially during the Neopalatial period, the era that was contemporary to the last phase of the site of Akrotiri.

Required reading

Younger and Rehak in Shelmerdine 2006: 140-164

Food for thought
Can you identify any objects that are possibly originating from the Cyclades?

8 July (Sunday)
14. Cemetery and society
Site visit: Fourni Archanes

Description
One of the greatest sources of information for the students of the prehistoric societies come from the cemeteries of these people. Their mortuary customs, the burial offerings and the way they treated their dead reveals a wealth of information regarding their technologies, the way they traded with their neighbours and their social ranking. The cemetery at Fourni Archanes with more than 1000 years of continuous use will be explored.

Required reading  
Fitton 2002: 50-54, 189-191 (Fourni cemetery)

Recommended reading  
Sakellarakis and Sakellarakis 1997: 152-267
Younger and Rehak in Shelmerdine 2008: 165-85

Food for thought  
Can you identify any changes in the burial practices and the architecture of the tombs?

15. A palace and a workshop  
Site visits: The Palace of Mallia and Quartier Mu  

Description  
The Palace of Mallia with some of the most interesting features in the Minoan world will be the focus of our attention today, especially as we will visit this site prior to the Palace of Knossos. Spectacular storage facilities are part of the great complex and its key location will be discussed in connection with other major sites in the area. Afterwards, we shall visit the well preserved remains of the neighbourhood known as ‘Quartier Mu’ and discuss the presence of the workshops within the vicinity of the palaces.

Required reading  
Driessen in Cline 2010: 556-570

Recommended reading  
Fitton 2002: Ch. 3-4  
Pelon in Driessen et al. 2002: 111-121 (in French)

Food for thought  
The relationship between craftsmen, raw materials and palatial control

9 July (Monday)  
16. The ‘palaces’ of Crete  
Site visit: Knossos  

Description  
Despite heavy restoration, the site of Knossos is clearly of majestic character, highlighting the high level of organisation and skill of the Minoan culture. The Great Court, its wall paintings, storage facilities, workshops and the huge size of this palatial complex will be discussed in situ and the connections between Knossos, the rest of Crete and the Cyclades will be understood within the greater Aegean context.

Food for thought
Have you come across a similar system of political organization anywhere else in later periods, e.g. at medieval Europe?

18. Aspects of everyday life in Minoan Crete
Site visit: Gournia
Description
Located in eastern Crete, Gournia survives remarkably well and we will have the chance to walk within its stone-paved alleys. It is one of the few surviving Minoan towns with evidence for a very organized society of craftsmen focusing as it seems on pottery production. Very close to the beach, it seems that Gournia had ship-shed facilities as well. Its Mycenaean period is also visible, allowing us to draw useful conclusions about the life of everyday Cretans through a lengthy period of time.

Food for thought
Do compare the site of Gournia with Akrotiri and try to identify any similarities and differences.

11 July (Wednesday)
19. Minoan political and economic geography
Site visits: Phaistos, Agia Triada and Kommos
Description
Trade is considered to be the life-blood of several island communities already from the 3rd mil. B.C. In addition, it is one of the reasons for some settlements thrived over the centuries. Selection of location is a key decision, as trade routes between the Aegean, Africa and Asia were more or less established from the Middle Bronze Age. Kommos and Phaistos are two major sites and we are going to discuss their role within Minoan Crete. At the same time, we are going to explore the role of Agia Triada that seems to be the major site in the valley during the Mycenaean period.

Food for thought
Bronze Age Crete at the crossroads between three continents. What was the role of Kommos and Mochlos?

PM: Departure for Athens

12 July (Thursday)
Free day
13 July (Friday)
20. Introduction to the Mycenaean culture
Venue: CYA
Description
The Mycenaean culture dominated the Aegean region during the 14\textsuperscript{th} and 13\textsuperscript{th} c. B.C., but it firstly appeared in the Argolid in the 17\textsuperscript{th} c. B.C. Closely related to the island of Crete and the Cycladic islands, the Mycenaean societies created a very distinctive material culture. They had certain burial practices, magnificent fortified citadels and a very characteristic script, Linear B. As usual, trade has played a major role in their economic and political expansion.

Food for thought
Why did the rising Mycenaean elite decide to bury their dead with luxurious offerings and works of art? Is there a symbolic meaning behind the offering of weapons?

14 July (Saturday)
AM: Departure for Nauplion

21. Citadels of the Mycenaean world (part I)
Site visit: Mycenae
Description
Visiting the site of Mycenae (and the local museum) will contribute greatly to the understanding of the Aegean world at the first phase of the Late Bronze Age. Contemporary to Akrotiri and with several artistic similarities, Mycenae is about to expand economically, artistically, culturally and perhaps military and to become a major player in the politics of the Palatial era. In this fieldtrip, we shall explore the societies of the LBA mainland and compare them to those of Crete and the Cyclades. We are going to discuss the Shaft Graves, the fortified citadel as well as the tombs and houses outside it.

**Food for thought**
Compare the site of Mycenae of the 16th c. B.C. to that of the 13th c. BC.

### 22. A burial landscape

**Site visit:** Dendra cemetery  
**Description**
The cemetery of Dendra seems to have been the burial ground of the mighty citadel of Midea, which is situated very close to this site. A good number of chamber tombs and a grand tholos tomb have been discovered, allowing scholars to study various aspects of mortuary architecture and to discuss the material culture found. The bronze corslet now exhibited at the Nauplion museum (see next day) was found at this site.

**Food for thought**
Which tomb do you think the bronze corslet came from? Think again.

### 15 July (Sunday)

23. Mycenaean arts and crafts  
**Venue:** Archaeological Museum of Nauplion  
**Description**
After having explored two of the Mycenaean citadels of Argolid, we are going to have a look at the greater picture of the area as exhibited in the small yet impressive museum of Nauplion. The Late Bronze Age of the region will be discussed as we are going to walk around some of the most amazing products of Mycenaean craftsmen including a unique (to this day) bronze panoply.

**Food for thought**
The Mycenaean Aegean koine. Common language, burial customs and artwork. Does this mean one kingdom (or state or polity)?
24. Citadels of the Mycenaean world (part II)

Site visit: Tiryns

Description
The huge fortification walls (that date earlier than those of Mycenae) encircle an area that included two megara, several workshops, halls and propyla. Seemingly this was yet another fortress at the area of the Argive plain, very close to the sea (only 1 km in the Late Bronze Age). Our main task will be to compare this site with Mycenae and discuss its role and purpose of existence.

Food for thought
Mycenae, Tiryns, Midea and perhaps Argos. At least three fortified citadels at the Argive plain. How do you explain it?

PM: Departure for Athens

16 July (Monday)
25. Trade and Diplomacy in the Eastern Mediterranean

Venue: CYA (workshop)

Description
The nature of the connections between the Aegean and the East will be explored based on both the material culture and the (limited) textual evidence. The well-known Amarna Letters will be discussed in this class as they offer a unique insight to the thoughts and dialogues between the rulers of the Late Bronze Age, with the Aegean people being almost absent. Yet, it is crucial to understand how societies would communicate at a diplomatic level and the exchange of luxury gifts would certainly keep certain balances between the various states (although some famous battles took place between them).

What was the role of the Aegean societies within the Great Powers Club of the 14th and 13th c. B.C.?
17 July (Tuesday)
26. Marking the landscape
Site visit: “Treasury of Minyas” tholos tomb
Description
Comparable only to the “Treasury of Atreus” at Mycenae, the “Treasury of Minyas” is an impressive tholos tomb of the 13th c. B.C with a monumental entrance, a side chamber decorated with reliefs. A dynamic landmark of a thriving society or the burial place of a mighty ruler?

Food for thought
Where else have you encountered tholos tombs with a side chamber?

27. Organising a Mycenaean state
Site visit: Thebes
Description
The Mycenaean town of Thebes (whose name te-qa appears several times in the archives) was a major administration and palatial centre of the 13th c. BC on a walled citadel. Discoveries include inscribed stirrup jars, a Linear B archive and magnificent wall paintings. Our aim is to explore the internal structure and communication networks of this major settlement, as a case study.

Food for thought
How do you explain the presence of all these imported cylinder seals? Do they have the same meaning for the Aegean people as for their Near Eastern neighbours?

18 July (Wednesday)
28. Eastwards via Cyprus
Venue: MCA
Description
Trade is considered to be the life-blood of several island communities already from the 3rd mil. B.C. In addition, it is one of the reasons why some settlements thrived over the centuries. Selection of location is a key decision, as trade routes between the Aegean, Africa and Asia were more or less established from the Middle Bronze Age. Cyprus played a major role in the trafficking of goods and raw materials and this visit to the Cypriot collection of the MCA will make clear how objects, technologies and peoples were moving around the coasts of the Eastern Mediterranean littoral.

The economic relationship between the Aegean and Cyprus based on the available material evidence.

**19 July (Thursday)**
**29. The end of the Bronze Age**
**Venue:** CYA

**Description**
The Aegean and the Eastern Mediterranean witnessed a widespread transformation due to the collapse of the political systems during the late 13th and 12th centuries B.C. Several theories and hypotheses have been suggested in order to explain these radical changes and they will be under examination at this class. However, life goes on and a very interesting post-palatial period appears to have happened, the Late Helladic IIIC that will be our focus of the day.
